

■ Features :

- *Universal AC input / Full range
- *Protections: Short circuit / Overload / Over voltage
- *Cooling by free air convection
- ·LED indicator for power on
- *100% full load burn-in test
- *All using 105°C long life electrolytic capacitors
- *Withstand 300VAC surge input for 5 second
- 'High operating temperature up to 70°C
- *Withstand 5G vibration test
- *High efficiency, long life and high reliability
- '3 years warranty

NOTE	2. Ripple & noise are measure	ally mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature. red at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.											

- 3. Tolerance: includes set up tolerance, line regulation and load regulation. (In order to meet tolerance, it is recommended that CH1 load > 20% rated current for A, B type and CH1 load > 10% rated current for C,D type.)
- 4. Line regulation is measured from low line to high line at rated load.
- 5. Load regulation is measured from 20% to 100% rated load, and other output at 60% rated load.
- 6. Each output can work within current range. But total output power can't exceed rated output power.
- 7. The power supply is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." (as available on http://www.meanwell.com)
- 8. Length of set up time is measured at cold first start. Turning ON/OFF the power supply very quickly may lead to increase of the set up time.

 9. The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft).
